

ABSTRACT

In one embodiment, a tuner cartridge has a tuner to demodulate video signals, a first bus connector to receive modulated signals and supply the modulated signals to the tuner, and a second bus connector to send baseband signals received from the tuner. In
5 another embodiment, a tuner system has a slot to receive a tuner cartridge, a baseband bus to connect to a tuner cartridge in the slot, and a source bus to connect to a tuner cartridge in the slot and to supply modulated video signals to a tuner cartridge in the slot.
